### ABOUT ME

I am Junior Web Developer with a strong foundation gained from the Web Development course at Logate Institute. My final project, involving Angular, TypeScript, MySQL, and Node.js, provided practical experience in web application development. I have solid skills in JavaScript, HTML, and CSS, and I am eager to learn PHP for backend and React for frontend development. I thrive in team environments and am committed to continuous learning and growth.

### EDUCATION

#### ETS "VASO ALIGRUDIC"

High School - Computer Science

### COURSES

#### LOGATE INSTITUT

Web Application Development  
using TypeScript

### SKILLS

HTML  
CSS  
JavaScript  
MySQL

### LANGUAGES

English  
Deutsch

### WORK EXPERIENCE

#### DATIKA.ME

2024-2025

Web Admin

- Develop Chrome extension to automate the purchasing process with suppliers**, using JavaScript, API, chrome.DOM, HTML, and CSS. This extension speed up the ordering and purchasing process by over 50%. It also includes a feature that allows the sales sector to select a specific item code and choose the supplier from which to purchase or verify availability.
- Developed a Chrome extension for warehouse management**. When the sales team orders supplies from suppliers, the warehouse manager can track all orders and sort them by preferred suppliers. The extension provides filtering by suppliers, automatic printing of lists for couriers picking up items from the suppliers, and allows the manager to add, edit, delete, and filter products. All data is stored in local storage for quick access. This extension was built using JavaScript, HTML, and localStorage.
- Customer Support Representative**: Managed customer inquiries and issues related to product orders, provided detailed product information, handled complaints, and maintained records of interactions to ensure customer satisfaction and loyalty.
